-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Information Disclosure Statement

1. No IDS has been filed to date in this application.

Drawings

2. The drawings were received on February 20, 2004. These drawings are acceptable.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. **Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

A. This claim recites the term "pneumathode" in relation to an inflatable body-heat retaining jacket. This use of the term renders the claim indefinite. A search of the United States patent database revealed only one use of the word "pneumathode" apart from the instant application; the use being a botanical term. An internet search using the search engine Google™ also returned numerous hits of "pneumathode" in a botanical context but none in relation to a jacket. It is, therefore, unclear what exactly is meant by "pneumathode" within the context of the instant invention.

B. In line two of the claim, it is unclear what the word "its" refers back to.

C. The term "basic" in line three of the claim is a relative term which renders the claim indefinite. The term "basic" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It is unclear what constitutes basic within the context of the invention or how "uncomplicated" the material must be to be considered "basic."

D. In step (1) of the claim, it is unclear how and to what the layers are applied "with."

E. The term "stable" in line three of the claim is a relative term which renders the claim indefinite. The term "stable" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It is unclear how stable the finished product must be to be considered "stable" within the context of the invention and it is also clear how and with respect to what such stability is measured.

Conclusion

5. The indefinite nature of the claim significantly hinders thorough searching. It appears that the "pneumathode" is some sort of inflatable chamber (pp. 3-4 of the spec.) formed by application of the layers. If this is the case, the prior art does not appear to teach or suggest the claimed method.

6. US 5,653,699 A is cited as pertinent. This reference teaches a micro-porous PU base and a hydrophilic PU layer used as a wound dressing.

7. The prompt development of clear issues in the prosecution history requires that applicant's reply to this Office action be fully responsive (MPEP § 714.02). When filing an amendment, applicant should specifically point out the support for any amendment made to the disclosure, including new or amended claims (MPEP §§ 714.02 & 2163). A fully responsive reply to this Office action, if it includes new or amended claims, must therefore include an explicit citation (i.e., page number and line number) of that/those portion(s) of the original disclosure which applicant contends support(s) the new or amended limitation(s).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Fletcher III whose telephone number is (571) 272-1419. The examiner can normally be reached on Monday through Friday, 0900h-1700h.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy H. Meeks can be reached on (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
